***Allowable Subject Matter***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael A. Messina on 6/5/2009.

The application has been amended as follows:

In claim 1, change the preamble for -- An apparatus for print preview which presents printout before printing by a digital printer, comprising: --.

2. Claims 1, 3-5, 7-9 and 11-12 are allowed.

3. The following is an examiner's statement of reasons for allowance:

(1) Claims 1, 5 and 9 are directed to apparatus for print preview which presents printout before printing by the digital printer, a method of the same and computer readable medium performing the same. Claim 1 for example identify the uniquely distinct features of "a display control portion for transferring and storing print data corresponding to the printout to be displayed as the print preview from the print data storage portion to the display data storage portion via the one-sheet data storage portion, and thereby presenting the printout on the display portion; wherein the display control portion transfers and stores print data for more than two pages from the print

data storage portion to the one-sheet data storage portion as the display data for one sheet, based on a print setting set by the print setting portion; wherein the display control portion transfers and stores the display data successively stored to the one-sheet data storage portion to the display data storage portion while offsetting the storage address for each sheet of display data, while preventing transfer of display data associated with the part of the print data corresponding to an area located behind another sheet as a result of stacking a plurality of sheets out of the print data for a plurality of pages; and the display portion presents printout for the plurality of sheets in parallel offset positions sheet by sheet based on the display data stored in the display data storage portion by the display control portion." As stated in the remarks filed on 2/02/2009 that "according to the invention as recited in the amended claims, print data is transferred from the print data storage portion to the one-sheet data storage portion page by page; and display data is transferred from the one-sheet data storage portion to the display data storage portion sheet by sheet. Thus, a plurality of paginated sheets are displayed on the print preview screen. The claimed print preview apparatus is advantageous at least in that multiple sheets can be easily compared in a print preview screen to check the print layout in specific areas of the sheets; for example, to confirm the position of page numbers or the margin size. These advantages are not obtained by the methods or devices of the cited references. While the cited references disclose displaying multiple pages on the print preview screen, each of the multiple pages is respectively printed. That is, the cited references do not disclose a technique for previewing a plurality of paginated sheets, as claimed. Multiple single pages are

successively displayed on the print preview screen in the cited references, while multiple multiple-pages are successively displayed on the print preview screen according to the present invention (see, e.g., Fig. 1 of the present application). None of the cited references, either alone or in combination, describes or suggests these claimed features". The prior art of record, either singularly or in combination with other cited references fails to anticipate or render the above underlined limitations obvious (when used with all the claimed limitations).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LENNIN R. RODRIGUEZ whose telephone number is (571)270-1678. The examiner can normally be reached on Monday - Thursday 7:30am - 6:00pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, King Poon can be reached on (571) 272-7440. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
